

Team Developer 6.0-SP1

Key	Summary
TD-3995	Picture icons on popup menu items are not working
TD-4461	Resizing MDI child windows with theme causes the docked MDI parent toolbar to flicker constantly
TD-4927	SalPrtSetup()/SalPrtSetDefault() instabilities
TD-5748	Problem by using SqlFetchRow() and SqlGetResultSetCount with Native Oracle Router
TD-8591	ODBC ROUND, OLEDB TRUNCATE
TD-8836	Pressing enter after selecting a search option in the Find and Replace dialog toggles the option instead of doing the find
TD-9049	RTF-Control: Tooltips and menus not in local language
TD-9246	SalEditInsertObject() brings up a dialog that the customer can't read
TD-9433	Background text not painting correctly
TD-9559	Pushbuttons no longer support attribute Button Appearance: Flat Look
TD-9577	Flickering-Effect (background, table, checkbox)
TD-10032	Date Picker - How to differentiate click between arrow and actual date
TD-10075	DOC BUG: better information on Rich Text Control string requirement: it requires a multi-byte (not Unicode) string
TD-10079	SalTblSetLinesPerRow(): since v4.2, now 5.2 as well, calling with COL_MultilineCell no longer allows Ctrl+ Enter to add a new line
TD-10181	Two SAM_Click messages sent to a pushbutton when the user rapidly clicks 2 times on the button
TD-10304	Large READ IN Performance DEGRADATION from earlier TD versions
TD-10400	Popup Edit Table window cell selection no longer workin
TD-10857	Checkbox with mnemonic title ("&check me") does not get checked/unchecked with Alt + C
TD-11128	Icons in menu do not allow transparency (ribbon works)
TD-11217	SalFmtSetPicture() and SalFmtIsValidPicture() don't work if the Windows regional setting "Digit Grouping" uses spaces
TD-11219	SalFmtFormatNumber() does not use the FULL decimal places sepcified in the format when Regional setting uses space for digit grouping
TD-11355	Getting an message 'All Files (*.*) *.* ' after modifying a tab class
TD-11440	Declaring instance of a dialog box Class with named statics, causes instance to use default background and group names
TD-11662	With EMP5259 3D Face Color is now transparent
TD-11809	RTC: disabling the Unlink toolbar button not working: SalRTFShowToolBarButton(rtc1, RTF_BTN_UNLINK, FALSE)
TD-11921	SalContextMenuSetPopup: Named menu Popup cannot be disabled, even with Enabled When: FALSE
TD-12113	SalTblPopulate() into TW with dynamic columns does not fetch DB column value if it is a single space char.
TD-12122	RTF Control: Assigning a ML text field the contents of an RTC causes any CRLF to be lost

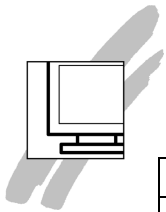

Team Developer 6.0-SP1

TD-12205	Database Explorer: Sorting in Database Explorer leads to 'invalid operator'. If you try again TD crashes.
TD-12209	Tooltips do not show up properly if you you increase the font of the outline
TD-12408	CRASH: calling VisListFindValue(hWndList, nStartIndex, nValue) with an nStartIndex value other than -1
TD-12486	MDI window not visible in maximized state using two monitors, only if primary and 2nd monitors are different resolutions
TD-12617	Crash after 72 iterations of a loop that saves a 1-page report to a PDF file.
TD-12668	Infinite loop with form option buttons while modal dlg. box is displayed
TD-12844	LATE-BOUND function runtime CRASH: with sequence of form and child table window classes
TD-12934	INGRES: Numeric value out of range inserting a decimal via a bind variable
TD-13001	Page Navigator enhancements (icons and panes)
TD-13013	Tooltips don't show up for buttons on the "Tools" toolbar
TD-13043	Painting issues in TOM when resizing windows
TD-13049	Calling VisTblSetCellColor() while re-populating a grid with it's scroll positioned at the bottom causes a problem in the painting process
TD-13109	IDE: If you click off or move to outline without < CR> or < TAB> when naming a control ID the value isn't saved
TD-13137	MDI Ribbon Bar with Pictures: Memory Leak each time an MDI child form is activated/brought to top
TD-13145	GRID and SalTblDefineRowHeader: row header value doesn't update correctly when clicking vert. scroll bar down
TD-13176	Diff - Merge -Tool doesn't show result in command line mode
TD-13222	TDWS wrong result for WSDL type INT. Negative returned value will have the sign remove during de-serialization
TD-13453	UI layout issues in Visual Diff Tool - relates to Icons transparency and themed About box
TD-13487	SalSetProfileString() writes in insert instead taht in append mode when run in WPF
TD-13586	Oracle10//11 : 1618 - Invalid parameter type for procedure/external function
TD-13587	Combo selected item not shown after window creation in WPF mode (painting issue)
TD-13651	TDWS would not generate the proxy class of a complex type, this used to work with previous TD version
TD-13730	WPF Compiler: On compile error, IDE in WPF does not expand outline and select first item which failed the compiler
TD-13835	SalGridSetAltRowBackColors(...) runs only on WPF
TD-13889	qtab2tab conversion: user's non-standard qckTabs app in version 5.2 will not convert
TD-13975	Win32 and WPF: Flickering/reposition of objects during window creation
TD-13976	WPF application crashing the IDE at compilation F8

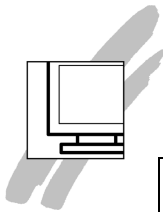

Team Developer 6.0-SP1

TD-14017	SalDisableWindow() applied to a rich text control generates a GPF when mouse over
TD-14111	GRID: with drop-down list, assigning column "XX" value (short for longer list entry) (re)selects the entire list item
TD-14135	Web service call used to fail the third time, now it crashes the first time
TD-14136	Oracle SqlPLSQLCommand : Invalid parameter type for procedure/external function error 1618
TD-14150	WM_MOUSEMOVE msg. is not being sent to Date Picker & Date Time Picker
TD-14159	Call to web service crashes
TD-14160	TDWS: WS wizard failing generating class from a WSDL containing simple data types.
TD-14169	GRID: Date column with Format: dd/MM/yyyy and Input Mask: 99/99/9999 cannot be Tabbed out of in EXE
TD-14173	Read/Write to database (SQLServer) is much slower then hang
TD-14216	GRID: After SalTabSortRows() is called, any rows with ROW_Hidden flag set TRUE get it reset to FALSE
TD-14224	TDWS failure to generate proxy using external XSD and failure to generate certain class
TD-14248	Hiding a dialog box and MDI window then redisplaying shows a visible 'flash' of the desktop
TD-14259	SalXmlWS.apl method __SalStrToNumberIntl() is not correct. Negative number passed in it returns as a pos. number
TD-14260	CRASH: when you right-click on an item in design mode to display Properties dialog box
TD-14261	SalCreateWindowEx() call to add a child form to a main form's toolbar 'snaps' the child form to UL after resize
TD-14275	Win32: Group Boxes -- with some themes, like XP, the group box border takes on a deep 3D look; with other it's flat
TD-14286	TDWS: Can't transfer doc contents to a Byte Array Via Web Services
TD-14298	Unable to associate top level window to navigation bar Pane
TD-14302	Placement of drop-down in a table combo is not correct when moving the form/dialog
TD-14336	Win32: Trapping SAM_NetException is compiling when in Win32. It should generate a "Symbol is Undefined" compile error
TD-14344	Win32 Tab Bar: clicking tab pages out of order -- like 1,2,4,5,3 -- do not correctly display tab child for that tab page
TD-14345	Win32: Dlg. box title is not Themed. Form and Msg. box are
TD-14346	Win32: 3D Face Color -- inconsistent display with various Windows themes, especially compared to a v5.2 of the same test case
TD-14347	Win32: In design-time Frames always appear behind a Group Boxes. Doesn't matter how they're listed in the Forms' Contents section
TD-14348	Win32: Tab Bar with Combo Box child: when combo is disabled, then enabled, the field portion is not repainted to white
TD-14349	Win32: Tab Bar -- an editable data field as Tab Child displays arrow cursor over field, even with focus in that field.

Team Developer 6.0-SP1

TD-14352	.NET explorer : incoherent proxy generation
TD-14361	Win32: "Flickering" (multiple repainting) of MDI Forms when clicking one form, then the other
TD-14367	WIN32 unable to consume assembly using collections of HashTable objects
TD-14369	WPF Grid checkbox and radiobutton cannot be centered
TD-14370	SalSetWindowSize() inconsistency when sizing on object in a TAB BAR container
TD-14378	QTAB2TAB -- crashes reported by a couple of users with large applications
TD-14384	ORA-01483: SqPLSQLCommand() dynamic array with DATE/TIME element set to DATETIME_Null
TD-14388	Win32/Report Builder crash: running simple report via SalReportView() and clicking "Next Page" button in RB Preview window
TD-14390	Report Builder: saving user's ORP displays warning "Expression not found contains an invalid path"
TD-14393	Win32 Tab Bar: With borderless data field set to 3D Face Color background in tab bar, mispainting as user assigns it, clicks pg2 and back
TD-14397	Tab bar style "Whidbey" with orientation bottom does not draw the bottom line of the tab bars
TD-14398	TABBAR receive SalSendMsgToChildren(hWndForm,...) on all there child
TD-14399	Tab Bar contents (child table) repaint issue when themed
TD-14400	Tab Bar contents (combo box) repaint issue when themed
TD-14401	Tree images not resized properly as tree font size is changed (larger or smaller than default)
TD-14406	Win32: a call to SalTabSetActivePage() is not sending SAM_TabChange in v6. In v5.2 SAM_TabChange is sent.
TD-14412	If you set a combo box to editable, SAM_Click is not sent when changing its entries with the arrow-keys (up/down)
TD-14415	Report Builder: Reports can not be opened or only error
TD-14424	Add empty support for WM_RButtonDown/WM_RButtonUp to SalTabControl
TD-14427	WPF : Symbol undefined error when hWndForm is used in SalSendMsg
TD-14428	Win32 Report Builder: Conditional Display on a line in the Page Footer is not correctly displaying/not displaying depending on num. input item.
TD-14430	Win32: SalTblCreateColumnFromClass(..., -1) should append new column to end of TW/grid, but function fails
TD-14431	Win32: SalTblCreateColumnFromClass() - width specified in Column class is not used to define instance width
TD-14433	Win32: After calling SalTblCreateColumnFromClass(), column class traps SAM_Validate but it is not sent
TD-14436	Almost no visual clue that an option button is on/off when it has a background color
TD-14440	Win32: If you have an APL with Build Settings = APD, if you use cmd. line "-m" to save as APD, it saves as APP

Team Developer 6.0-SP1

TD-14449	SqlPLSQLCommand crash when using DBMS_Output in a sepecific scenario
TD-14456	CHILD GRID: referencing hWndForm in a Named Menu does not work for a context menu in the child grid
TD-14457	WPF: Implement VisTblSetRowColorEx for WPF
TD-14459	Focus switches to the first field in a form after clicking on a dockable dialog title bar
TD-14460	Title bar shows on a form even though the attribute 'menu system' is set to 'no'
TD-14462	TDWS crashing in getting UDV Nodes
TD-14465	SalReportPrintToFile cannot generate correct PDF file if report contains Chinese characters.
TD-14467	Grid (failure by show of pictures in a grid)
TD-14468	SalSetWindowLoc and SalMoveWindow don't work with Dockable dialog form
TD-14475	Oracle and rowid with an outer join is not populating a tablewindow column correctly
TD-14481	TAB BAR: In IDE/design-time: Controls on Tab Bar Visible= NO are visible at design time until they are set to Yes the NO again
TD-14482	Win32 only: SalNumberToChar() returning wrong chars. for #155 & #156 in customer test case. Works OK in WPF.
TD-14487	TAB BAR: In IDE/design-time: TD crashes when you deleted item(s) from Tab Bar tab child
TD-14492	DBNull to type Date conversion error in WPF
TD-14506	Win32 TAB BAR: SAM_Create msgs' sequence out of order with Form&Tab Bar + that TabBar-child/child window: 2ndForm&TabBar
TD-14510	qtab2tab - Quick Tab Conversion Utility hangs and GPFs
TD-14533	SalWindowApplyDockState doesn't work correctly.
TD-14534	Child dialog resized to parent when placed in tabbar page + navigating
TD-14535	Report Builder : Printing RTF content is wrong
TD-14536	SalGetWindowSize() returns wrong values for controls placed in Tab bar
TD-14537	SalGetWindowLoc() returns wrong values for controls placed in Tab bar
TD-14538	SalSetWindowLoc() doesn't set to correct coordinates for controls placed in Tab bar
TD-14542	Win32 CRASH: During create of user test case showing Tree Control being populated
TD-14543	Win32: Bad Flickering on a repaint of a Tree Control with parent form's WM_SIZE msg.
TD-14544	WPF : SQLConnect returns problem related to informix driver if TOAD is installed
TD-14554	SalReportPrintToFile(..., < 0 = ASCII >) now saves TXT file in Unicode Format. Request for new constant to save ANSI/ASCII
TD-14557	Win32 TAB BAR: adding a tab child via the Coding Assistant and saving does not add Tab Child to the Tab
TD-14558	Win32 TAB BAR: Painting problems when running test case. Image (left) shows Tab 2 OK; right shows running from IDE

Team Developer 6.0-SP1

TD-14567	SAM_SqlError error handler displays a critical message in case of SQL error
TD-14571	DBMS error handler doesn't point to proper error messages
TD-14599	Tab Bar painting issue with picture control
TD-14612	Printing large report with bar code
