

## Bugliste für SQLBase 11.5 SP3

SQLB1164	A SQL statement is returning wrong results
SQLB1174	An unload takes an unacceptably long time to complete
SQLB 1175	Using .NET provider, when selecting date datatypes or CHAR datatypes an exception is thrown
SQLB1182	Read only or read committed transaction can read a bad page after a rollback of a transaction that does an index page split.
SQLB1183	German characters are not shown correctly after doing a Migration from SQLBase 10.0
SQLB1194	Restore snapshot with usecmcache= 1 takes too long
SQLB1198	Umlauts not put into long varchars correctly
SQLB1201	An 'EXISTS' clause takes more time to execute than an 'IN' clause
SQLB1206	Memory leak in dbsrvgui.exe
SQLB1208	SQLBase server on Windows may spin on shutdown (100% CPU usage)
SQLB1239	Wrong results if bind variable in where clause contains German Umlaute
SQLB1240	Using a bind variable that contains non ascii characters doesn't work in a select statement (row not found)
SQLB1244	An RO transaction can see the change if another transaction deleted all rows from a table.
SQLB1245	A custom install of the server without selecting the client element misses installing critical DLLs
SQLB1246	Unify .NET provider (Unify.SQLBase.Data) Index out of range error on a simple select
SQLB1248	Problem entering unicode characters into SQLTalk or TD application when using bind variables.
