OpenText Gupta Roadmap

SQLBase, TD Mobile, Team Developer

November 6, 2017 | Gary Bettencourt, Martin Teetz

SQLBase Roadmap

**SQLBase 12.2
Q4 2018**

SQLTalk Plus enhancements:
auditing, task scheduling
easier access to server stats and
administration of running servers
new SQL features
new server console

**SQLBase 12.0
Q3 2015**

database multithreading
enhanced multiuser performance
enhanced scalability
EDP deployment tool

Past

Future

**SQLBase 12.1
Q3 2017**

VSS enabled volume backups
new SQLTalk Plus SQL tool
limit clause and @format
function

SQLBase 12.1

- Released July 2017

- VSS enabled volume backups

- New SQLTalk Plus

- Automatic database upgrades

- SQL language
  - Limit
  - @format

- Support for Windows 10 and Windows Server 2016

13:40-14:20	SQLBase 12.1 features and benefits - backup in use volumes, learn how to use the new SQLTalk Plus and the SQL enhancements in SQLBase 12.1 Helmut Reimann

SQLBase 12.2

- Enhanced SQLTalk Plus for easy server and user administration
  - Database auditing
  - Scheduled tasks via Windows scheduler
  - Simple access to server, database and user statistics and related actions

- SQL language enhancements
  - limit statement with offset to allow scrolling from page to page
  - Function to tell if a string is a numeric value
  - Cast column/computation to datatype
  - Enhanced grouping, grouping sets
  - If /else or case statement for numeric values

- New server console
  - Easier access to server console data
  - Easier multi-server configuration, no console IP port required anymore

- Stored procedures to call .NET DLLs

- Rebuild indexes for corrupted indexes

Team Developer Roadmap

Team Developer 6.x

.NET
lots of UX enhancements
Web Services provider and consumer
constructors/destructors
and a lot more

**Team Developer 7.1
Q1 2018**

application multithreading
external source code management
custom theme
WPF controls for Win32/Win64

Past

Future

Team Developer 7.0

Win64
REST API
language enhancements
UX enhancements

**Team Developer 7.2
Q1 2019**

code diagnostics and analytics
window resizing
low code DB access
low code REST
user requested enhancements

opentext™

Team Developer 7.1

- Application multithreading

- Source code version control

- UX enhancements
  - Custom theme
  - .NET WPF control preview in layout design mode
  - .NET WPF controls usable on Win32 and Win64

- Programmer productivity
  - Window functions tab
  - Switch errors off when loading source
  - ACA enhancements

11:15-12:00	Team Developer 7.1 multi-threading - get insight in how to leverage multi-threading with your TD applications Gary Bettencourt
12:00-13:00	*Lunch*
13:00-13:40	Team Developer 7.1 feature details: source code management, new custom theme, use .NET WPF controls with Win32/64,and more Martin Teetz

Team Developer 7.2

- Code analytics
  - Code diagnostics and analytics, trace calls and messages, profile execution time of calls

- Window resizing (anchor controls)

- Low code REST

- Low code DB access, easy UDV generation, CRUD operations

- User requested enhancements

TD Mobile Roadmap

TD Mobile 1.x – 2.0	TD Mobile 2.1	TD Mobile 2.2	TD Mobile 2.3
2014 - 2015 from Web only deployment to Web and hybrid native low code data access for sql and nosql databases table, map and chart control	**Q1 2017** editable table control slider and range slider conditional data coloring new page events bind events integrated native compile web.config staging and production variables	**Q2 2018** source control including diff and merge utility global JavaScript functions if else JavaScript expressions User defined events and event actions limit & skip for data operations	**Q2 2019** offline mode using new service worker API parse included JS for functions, use in ACA global binds, global client side constants user requested enhancements

TD Mobile 2.2

- Source control (diff & merge utility)

- Global JavaScript functions

- If Else JavaScript expressions

- User defined events, user defined event actions

- Limit & skip on data operations

| 14:40-15:20	TD Mobile 2.2 feature details: source code management and more Gary Bettencourt
15:20-16:00	TD Mobile technology deep dive Gary Bettencourt

TD Mobile 2.3

- HTML5 offline cache currently in use is deprecated, update offline mechanism to new "service worker API"

- Parse included JS for function names, show function list

- Global binds, global client side constants

- UX framework to use, build option ionic/angular?
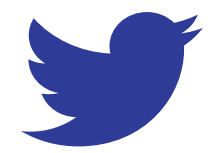

- User requested enhancements

OpenText Gupta Product Timeline

October 2016	January 2017	July 2017	January 2018	Q2 2018	Q4 2018
Team Developer 7.0	TD Mobile 2.1	SQLBase 12.1	Team Developer 7.1	TD Mobile 2.2	SQLBase 12.2
