5 Installation and upgrade notes

This section provides additional installation and upgrade information, including related or third-party product information and any required critical patches.

5.1 Installation notes

Before you install Team Developer, review these additional installation notes and verify related product or third-party product requirements.

- For a full installation of Team Developer 6.3 have your PMC installation code at hand.

5.2 Upgrade notes

Before you upgrade, review these instructions.

- When upgrading from older Team Developer versions it is strongly recommended that you save all existing source code in text format.

6 Patches

A *patch* is a piece of software that is designed to fix or improve a computer program or its supporting data. These may include repairs to security vulnerabilities or resolution of bugs, and may also improve usability or performance. On the OpenText Knowledge Center you will find two general types of patches. *Hotfixes* are also known as quick-fixes or bug fixes. *Updates* are also known as service packs or service releases.

The following patches must be applied to Team Developer 6.3 SP2. OpenText recommends that you check the OpenText Knowledge Center (<https://knowledge.opentext.com/knowledge/llisapi.dll/Open/62048528>) for any patches or documentation updates that may have been posted after this release.

6.1 Hotfixes

Hotfixes are small patches that address software issues. Typically, there is no new functionality in a hotfix. Hotfixes can be cumulative.

6.1.1 Hotfix installation

6.1.2 Available hotfixes

No hotfixes available for this release.

6.1.3 Updates

Updates consist of a number of fixes combined into a single patch. Typically, the minor version number of the product will increase, for example from 2.0 to 2.1. An update may also include new features proactively introduced into the product. In most cases, updates are cumulative.

6.1.4 About Team Developer 6.3 SP2

Before installing the update, ensure that you have met the following prerequisites:

You can do a full install of Team Developer 6.3 SP2 or you can patch your existing Team Developer

6.3 installation. The update installer will automatically detect existing Team Developer 6.3 installations and will update them.

Team Developer 6.3 SP2 is cumulative and includes all fixes since the original release of Team Developer 6.3.
