

Кеу	Summary
TD-4667	In Table Windows CTRL + C can't be used with ReadOnly columns to copy/paste via clipboard
TD-14654	WPF: Pushbutton image is not greyed out though PB background is when PB is disabled
TD-15087	TD Picture control in Toolbar: WM_MOUSELEAVE sending behavior is different than in v4.2
TD-15107	Report Builder SalPrintReportToFile(, PDF): QRP item field Property "Between Lines: Single" is being ignored when printed to PDF
TD-15129	Scroll bars on resizable dialog
TD-15808	Painting problem when using the "Find and Replace" feature
TD-16849	Expressions Window: In WPF a 3-part string concat. like: 'John' ' ' 'Smith' - fails with error "Error evaluating John Smith"
TD-16980	Converting a SQLWindows report (16-bit) to TD Report Builder produces a blank report
TD-17205	Debugger/Breakpoint setting and SalPostMsg() in form SAM_Create and SAM_CreateComplete TD is processing SAL lines before hitting BP
TD-17501	cQuickHTML: Migration of application is not converting cQuickHTML c/c QWAX:cQuickHTML from qwaxi60.dll to qwaxi61.dll
TD-17542	Win32 mode - TAB BAR in DYNALIB: When Page 2 of the APD's TAB BAR clicked in the form, TD crashes
TD-17602	CDK-Written User Tool: CDK app. is an EXE User Tool, invoked by TD to change the current outline. User Tool changes the outline in test case but TD is not alerted of this
TD-17751	Unable to consume Web Service from WPF Desktop Application
TD-17755	Report Builder and Page Header field with Property: "Repeating Values - Suppress" checked: 1 Page report does not print field value. > = 2 pages, then field printed
TD-17768	WPF and Tab key behavior with hidden fields on a form: To Tab from 1 visible field to the next one, if hidden fields 'between' them in Contens, you must click Tab several times
TD-17770	Pressing the "Enter" key doesn't fire WM_KEYDOWN
TD-17809	cQuickGraph missing Toolbar + numbering
TD-17811	Allow docked dialog context menu to be disabled
TD-17839	TAB BAR SalTabAddPage: Function adds a new tab page to tab bar, but set focus and displays this new tab page. QckTabs Add() did not change focus, it just added a page
TD-17856	ReportBuilder Active X causes that the application hangs when closing it's host window, when this has been created as a child of an MDI
TD-17888	TOOLBAR with Data Field and Background Color: Depending on the Theme, Ftoolbar Field bkgnd. color remains solid and does not display gradient color as field in form client does

TD-17889	TAB BAR and dynamically created Tab Pages: functions SalTabGetPageName() and related SalTabGetPageIndex() are not working correctly
TD-17903	THEME painting issue: For older theme like Native WinXP, Dialog status bar has no upper line; after creating/destroying a 2nd dlg. box upper line appears
TD-17917	Icon on Option Buttion is not scaled correctly
TD-17974	Unable to create instance of object. [Error: 0x80040154] Class not registered
TD-17981	In layout mode, when clicking between pictabs the forms are not painted correctly
TD-18022	NAMED TOOLBAR, RIBBON BAR, MDI: If RB enabled, Named Toolbar on MDI positions incorrectly to the right of Ribbon Bar. Setting MDI Acc. Enabled = Yes no help
TD-18069	Poor performance on Report Builder
TD-18109	NAV BAR with 3 PANES and 3 TREE Controls: Design-time OK, but when run in IDE the Nav Bar Pane1 does not display its Tree Control. Panes 2&3 OK
TD-18230	QTAB2TAB.APL when calling SalTabRemovePage(picTabs, 0) to remove a tab page from the TAB BAR, the *first time* an extraneous TABSM_TabActivateFinish is sent
TD-18231	QTAB2TAB.APL class cTabControl.Clear() method (it should clear/remove all pages from Tab Bar) is not coded correctly
TD-18245	TAB BAR: Late-bound method TabActivateFinish() and picTabs.BringToTop(): Causes a stack overflow runtime error
TD-18247	IDE ACA - Active Coding Assistant: class instance array like gTextA[0].bBoolean select boolean and click F2, ACA should jump to class decl. for bBoolean. Now it jumps to gTextA[] variable
TD-18296	WPF Oracle OLEDB connection: Failing on SqlCreateSession
TD-18354	.NET Sal library runtime error : private class must be public
TD-18373	GetTop() is returning the incorrect value when called within TabActivateStart()
TD-18374	Application crashes when calling SalTreePromoteItem() on an Tree Item in which SalTreeSetItemTooltip() was been applied
TD-18421	ORACLE against DEPRECATED LONG would fail fetching when setting DB parameter SQLPLBUF (buffer size limit)
TD-18431	Having unassociated objects along with the existence of a dynamic tab control will cause that the application become unresponsive and then crash
TD-18439	Unable to scroll in an XBAP form
TD-18452	SalPrtSetup(): For some printers, parameters 1 (device) & 2 (driver) returned by this function are returning the same value.
TD-18458	SqlPLSQLCommand(hSql, <sp>) after called, Sql Handle hSql has it's LONGBUFFER length set to 64490</sp>
TD-18477	DB2 DATE/TIME insert / select problem when using bind

TD-18493	It does not matter whether the Background Text item is before or after the Frame in the outline, the Frame edge always overlays the text
TD-18494	When a Background Text and a Frame objects are both selected, the selection indicators (the small blue squares) disappear
TD-18509	SalTreeReset() wrong behavior when show Root = NO
TD-18599	TAB BAR and qckGRAPH: With a Tab Bar on a form with a qckGraph, the qckGraph is not being updated/refreshed
TD-18600	FORMATS Need to reject a format that's already entered if user enters via Field Attributes Formats:
TD-18616	MS SQL SERVER w/ TEXT and VARCHAR(5000) columns: If TEXT, VARCHAR fetched VARCHAR value not Unicode. IF VARCHAR, TEXT fetched, VARCHAR value OK
TD-18631	MODELESS DLGS: when 3 created in a form, then destroyed one a time the SalDestroyWindow() for 2nd dlg. destroys the 3rd dlg.
TD-18650	DateTime Picker and SalSendValidateMsg: SAM_Validate is not being sent if DTP is edited and Sal function called from a menu
TD-18690	TAB BAR and THEME_Office2010_R2_Black: When the test form is resized smaller so all Tab Pages are not shown, the TB's right arrow is invisible
TD-18702	WPF - SqlConnectDotNet() connect & SalTblPopulate: while the connect is OK, SalTblPopulate() is failing to populate a TW though there is no error msg.
TD-18709	Calling SalLoadApp() from a dialog while in WPF mode will cause that the application gets loaded behind it
TD-18713	After calling VisTblSetCellColor() the row header picture gets removed
TD-18714	After calling VisTblSetRowColorEx() the row header picture gets removed
TD-18717	TDWS interop issue: unable to de-serialize envelope from a PHP web service
TD-18729	SalCenterWindow() doesn't work correctly in WPF mode when the parent is an MDI window
TD-18730	Clicking outside of a modeless dialog causes that this gets sent behind it's parent while in WPF mode
TD-18733	Closing the parent of a modeless dialog won't cause the modeless destruction when the parent is a child of an MDI window
TD-18741	SalPopulate() / SAM_FetchRow issue only on TABLE WINDOW
TD-18758	Clicking out of a Modeless Dialog that was created as an MDI Child causes this to be sent behind the MDI
TD-18760	Application crashes when dialog is created as a third generation child
TD-18767	DBPipe IIS ONLY : remote exception Open fail to connect ONLY to SQBLASE
TD-18768	Starting DBPIPE server service ends up in unhandled exception
TD-18771	.NET SalTblPopulate() referencing an un-existing column returns no error and would not populate the table

TD-18788	WPF mode and COMBO BOX: SalSetWindowSize(cmb, L, < new height>) changes the visible height. Win32 (correct behavior) changes the drop-down list height
TD-18791	WPF & SalReportSetPrinterTray(): should be supported in WPF. Currently you get error "not supported in TD6.1 with a .NET build setting" when compiling
TD-18795	Improve GRID performance during runtime notably on SaITbIInsertRow () and SaITbISetRange()
TD-18835	SYBASE Japanese JIS charset : Concatenation of long string with string failure
TD-18841	Multiplying by -1 a numeric column initialized as NUMBER_Null causes that the column value changes to 0.00
TD-18855	Drag/Drop visual clue on WIN32 Tree Control lags randomly
TD-18868	If a function is called in SAM_FetchRowDone in a grid the performance decreases
TD-18870	ROW_Edited won't be fired for Drop Down Columns, unless you change the row focus
TD-18879	Object Nationalizer: Application crashes after being translated
TD-18932	hWndForm reference is missed when SalCreateWindow() is called from a window associated to a Tab Bar Page
TD-18938	In a grid, a horizontal scrollbar overlaps row causing row jumping behavior
TD-18948	Calling SalFmtFormatDateTime with a German regional setting misses the AM/PM setting
TD-18973	'.;' at the beginning of Global Path under TD preferences- > directories causes IDE to crash
TD-18977	Tab Control doesn't preserve the new name of an associated object when both belong to the same top-level window class
TD-18982	Grid's SAM_Click won't be fired more than one time if you click on the same cell multiple times
TD-18989	The keyboard accelerator Enter on a push button does not work when it is on a tab window and when it is not the first object
TD-18990	When priting to rtf controls if a row has null value the report stops with that row
TD-18995	Web Service Wizard (WSWiz61.exe) crashes when trying to generate the Proxy APL
TD-19002	Once a table is populated if a column value is assigned to a field with 3D face background colour on SAM_FetchRowDone, only the first row of data is visible in the table window
TD-19003	Once a table is populated if a column value is assigned to a background text on SAM_FetchRowDone, only the first row of data is visible in the table window if SalUpdateWindow is called
TD-19004	Columns in grid loose orientation if there is a column of type checkbox in grid and checkbox is checked and build target is .NET
TD-19008	Sending SAM_Close with SalSendMsg to a dialog including a tabbar does not reach the dialog

TD-19017	MDI chile form does not get activated when user clicks on the tabbar on the form
TD-19018	Even when VALIDATE_Cancel is returned by SAM_Validate by an object, it is possible to click on the next checkbox
TD-19035	Report Builder page borders do not show correctly when printing to RTF as output
TD-19036	Invalid character error returned by database explorer when changing the name of a table
TD-19049	Focus is lost when compiled using native windows xp theme
TD-19058	VistblSetColBitmap fails on grids
TD-19060	Router Informix UNICODE environment, no resultset returned when router log is enabled
TD-19062	Grid with many columns freezes when compiled as .Net executable
TD-19079	.Net explorer is not reseting the counter when an apl is generated from a .net dll
TD-19080	The image assigned to a Tree Control Item is not being scaled correctly
TD-19086	When a background text and a datafield overlap slightly, the background text does not paint correctly
TD-19091	Different painting behavior for Row Flags when using Keyboard Accelerator on a Push Button that populates a Grid Control
TD-19098	SalCreateWindowEx failed to create a form that made availalbe through a .Net sal library
TD-19107	Bad Performance with TAB BAR
TD-19109	VisMenuSetText() doesn't support '&' symbol on Ribbon Bar
TD-19113	Data fields with 3d face background colour on a child form created SalCreateWindowEx has painting issues
TD-19120	Service provider of a WS fail to read attachment sent due to TDWS adding unrequired tags in the envelope
TD-19131	Improve how we report XAML errors in imported Resource Dictionaries
TD-19132	SalUpdateMenu on a modal dialog makes the parent respond to hot keys while the modal dialog is active
TD-19140	When an attachment is sent via SalMail.Send function, the attachment remains locked unti the application exit
TD-19141	The horizontal scroll bar does not function on split table window
TD-19165	VisArrayFindNumber does not find the value 0
TD-19192	Cannot edit LABEL using shift-right click when label is embedded in a frame
TD-19202	Table2Grid : Application fails to compile after migrating from table to grid
TD-19207	Trying to set a value to a variable with the word Call doesn't give error

TD-19211	If a rtf control is null and passed as input item to a report, the report crashes
TD-19230	Grid sort functionality does not work on hidden columns in WPF mode
TD-19231	Line in frame has wrong painting priority
TD-19248	PageReset option in Report Builder is not working correctly
TD-19250	Zooming and Scrolling in Multi Charts gets out of sync
TD-19251	ORACLE: Insert of empty (NULL) value from Long String causes "0" (0x00) byte to be inserted
TD-19259	Grid drop down column does not generate Sam_AnyEdit when arrow keys are used to select an item
TD-19273	It should be possible to sort or group when a grid is populated with SalTblSetRange
TD-19298	Table and grild behave differently if .Net compiled has data with line feed
TD-19315	Heap corruption induced by window destroyed if it contains combo box set to always show list
TD-19320	Deploy installer misses to include "Telerik.Windows.Data.dll" as part of its deployed components
TD-19372	VisMenuGetCount does not count sub menu items
TD-19414	Entered data in grid column is invisible
TD-19420	When a date time picker is placed on a tab bar, edit flag is set to TRUE incorrely
TD-19431	Heap corruption simply by sending SalSendMsg SAM_Close to a form
TD-19455	SalMessageBox gets displayed behind the parent
TD-19462	Report Builder line / right border broken
TD-19472	Report Builder page borders do not show correctly when printing to RTF as output
TD-19473	Page Resetting is not working
TD-19474	When SqlError displays some wrong values next to it when arrow keys are pressed
TD-19475	SalTblClearSelection does not work on a child grid which is a tab bar element
TD-19476	if MaxDataLength is specified for a datafield, SAM_AnyEdit is not fired when pasting a value
TD-19491	WPF, Grid - tabbing thru columns not working correctly
TD-19495	Allow mtable to continue working with SalTbl implementation
TD-19523	Ribbon bar is causing performance issues
TD-19535	VisTblAutoSizeColumn reduces the size of the checkbox
TD-19584	Repeatedly deleting input items crashes Report Builder
TD-19598	Selecting item using keyboard from a drop down leave the previous item selected
