TD-22239        3D Face Colour background makes tabs display in different colour
TD-22246        When time value is 00:00:00 and when fetched into a variable,
.Net exe treats it as DATETIME_Null
TD-22247        SalXMLDeserializeUDV not functional on derived classes
TD-22278        System data validation message box loses the title
TD-22310        SalTblPopulateFromXML() fails with text columns larger than 100
characters
TD-22315        Painting issues in GRID
TD-22320        ORACLE statement ERROR in specific SQL statement (DECODE)
TD-22327        Dockable dialog does not display contents when shown after being
hidden
TD-22331        Oracle decode in SQL statement returns error
TD-22339        Switching focus from button to grid freezes TD
TD-22346        SalSetWindowText works differently with a datafield and a combo
box
TD-22351        Validate_Cancel on row validate is ignored when the scroll bar
is used to scroll in a grid
TD-22352        Validate_Cancel is ignored after clicking on a different column
in a table window
TD-22364        RTF text won't be displayed in report header
TD-22365        xbap app requires full TD install on the published server to
launch reports
TD-22367        Multiple pages report header text overlaps text in detail block
TD-22380        Connection String to supported router still requires a SQL.INI
...
TD-22381        Menu item "Checked when" state not properly reflected
TD-22385        Using long qualified bind variables with Sybase makes TD crash
TD-22386        Memory usage of COM server keeps increasing
TD-22387        FORM Width and height are 12 pixels less
TD-22388        Group box titles no longer drawn as disabled
TD-22391        Fails to publish application for IIS 10.0 (on Windows 10)
TD-22393        One part of the rtf text will be displayed outside of the Rich
Text report control
```

```
TD-22405        Proposed customer improvement in qcktabs.apl
TD-22406        SAM_Validate Issue for data fields and combo boxes
TD-22408        Web service returns Transport sender invoke failed error
TD-22415        Non random application crash due to stack-based buffer overrun
TD-22421        SalReportPrintToFile function using RTF Format crashes TD
TD-22423        Modeless Dialog Boxes Get/Set Window Size issue ( only when
using AERO and modeless DLG )
TD-22424        SalFileOpen () OF_BINARY / SalFileRead() truncation issue
TD-22425        SalStrToMultibyte/WideString fails on large buffers
TD-22428        SalSetBufferLength is not working correctly
TD-22437        SalSetBufferLength corrupts buffer
TD-22438        SalStrToMultiByte/WideChar corrupts buffer
TD-22451        Top level windows size and getting position of another window
object does not work correctly
TD-22459        Performance issue rendering GRID in IDE layout
TD-22460        [WPF] Error encountered assembling: gform2.app(196772): error:
syntax error at token '::' in: IL_000f:
TD-22466        Enter does not press the button that has the focus
TD-22531        nvarchar2 over 256 used to work with long string. Now it needs
string.
TD-22534        User and GDI handles leaking
TD-22540        Reading a varchar containing Umlautes and inserting into a long
varchar no longer works
TD-22566        Background text rendering issue ( truncation)
TD-22603        MailGetNextMessage() returns invalid characters for the
attachment.
