The screenshot displays the OTBI query editor interface. At the top, a diagram shows a relationship between a table named 'COMPANY' and a function named 'STATISTICS'. Below this, a table lists attributes for the 'COMPANY' table:

| Info | Attribut | Funktion | Kriterium (Y) | Gruppieren | Sortieren |
|------|----------------|----------|---------------|------------|-----------|
| ? | COMPANY | | | | |
| ? | • COMPANY_NAME | | | | |

| ? | STATE | | | | |
| ? | ZIP | | | | |
| ? | COUNTRY | | | | |
| ? | PHONE | | | | |
| ? | FAX | | | | |

A blue magnifying glass highlights the 'COMPANY_NAME' attribute in the table. Below the table, a query editor shows the selected attribute: 'COMPANY_NAME (COMPANY)'. A dialog box titled 'Datenwerte einfügen' (Insert Data Values) is open, showing a list of available data values:

- Acapulco Ropa Tropical
- Amazon Apparel

- Australia Clothing Outlet
- Betsy Ross American Fashions

- Dutch Designs
- Evelyn Clothing
- Fashion Outlet

The dialog also includes a filter input field, a 'Laden' (Load) button, an 'Alle laden' (Load All) button, and a status message: 'Daten aus Datei geladen. 24 Werte zurückgegeben.' (Data loaded from file. 24 values returned.)
