UI = user interface only

B = both user interface and online help

Component	EN	DE	JA	FR	IT	ZH	ES
SQLBase Server	B	UI	UI				
SQLTalk Plus	B		UI				
SQLTalk	B						
Command Center	B						

7 Installation and upgrade notes

This section provides additional installation and upgrade information, including related or third-party product information and any required critical patches.

7.1 Installation notes

Before you install OpenText Gupta SQLBase, review these additional installation notes and verify related product or third-party product requirements.

- You need to have Gupta SQLBase 12.3 installed to be able to install this Service Pack.

On Red Hat Enterprise Linux, the SQLBase distribution does not include certain libraries that are independently available through the package manager. These packages are:

- OpenSSL
- wxWidgets
- ICU – International Components for Unicode
- Java 1.8

These can be installed via the yum package manager. You may have to allow Linux to install its updates to enable more recent versions of the packages to be installed.

The wxWidgets package requires installation of the Extra Packages for Enterprise Linux repository. The following commands will install all of the above requirements:

```
# yum -y install epel -release
# yum repolist
# yum install wxGTK3 java -1.8.0-openjdk libicu openssl
```

8 Patches

A *patch* is a piece of software that is designed to fix or improve a computer program or its supporting data. These may include repairs to security vulnerabilities or resolution of bugs and may also improve usability or performance.

The following patches must be applied to OpenText Gupta SQLBase 12.4. OpenText recommends that you check My Support for any patches or documentation updates that may have been posted after this release.

8.1 Hotfixes

Hotfixes are small patches that address software issues. Typically, there is no new functionality in a hotfix. Hotfixes can be cumulative.

8.2 Updates

Updates consist of multiple fixes combined into a single patch. An update may also include new features proactively introduced into the product. Updates are also known as service packs or service releases. In most cases, updates are cumulative.

9 Fixed issues

This section provides information about past issues that have been resolved in this release.

Issue number	Issue description
5180054	UNLOAD of table fails with error "11103 APA TMB Too many booleans in a query "
5368850	Vulnerabilities with SQL Base Command Centre Task Scheduling Service
5266807	Support SQLBase and Red Hat Enterprise Linux 9
5194176	Create Trigger SQL is failing on SqlBase 12.3.4 (12.3.4.20), whereas same script works fine on SqlBase 12.3.3.20
4427235	SQLBase – Request to add support for Windows Server 2025.
5208430	Error with version 12.3.4, Order by" is incorrect(regression).
